

COVID 19 Response Measures in EASF region
19th May 2020

INTRODUCTION

This report will document the response measures taken by EASF in an effort to flatten the COVID -19 curve. EASF has ten Member States at different stages of the corona virus curve with one of the member states recording over 1000 cases. The Republic of Seychelles has no record of Corona virus cases.. The positive news is that the number of deaths are still quite low. On the other hand, testing is still limited in most EASF Member States and therefore most Member States have taken every precaution to protect their populations through a raft of socio-economic measures.

Total confirmed COVID-19 cases

Our World in Data

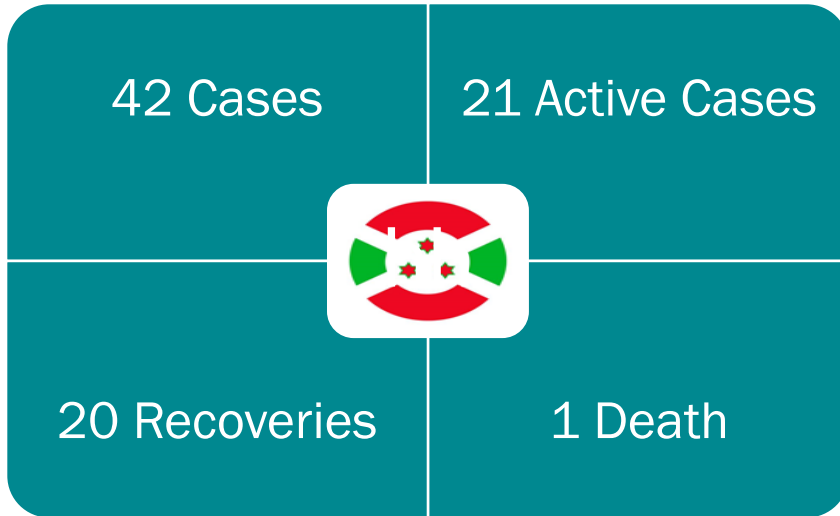

The number of confirmed cases is lower than the number of actual cases; the main reason for that is limited testing.
