

COVID 19 Response Measures in the EASF region
1st June, 2020

INTRODUCTION

This report will document the response measures taken by EASF in an effort to flatten the COVID -19 curve. EASF has ten Member States at different stages of the corona virus curve with five member states recording well over 1000 cases. The Republic of Seychelles has no record of Corona virus cases. The positive news is that the number of deaths are still quite low. On the other hand, mass testing has commenced in most EASF Member States and therefore all countries have taken every precaution to protect their populations through a raft of socio-economic measures which shall be enumerated in this report.

Total confirmed COVID-19 cases

The number of confirmed cases is lower than the number of total cases. The main reason for this is limited testing.
